

**Senate Bill(s) 933,974,977 Opposed / Amend (Judiciary Committee for the Record)**

Dear Clerk,

I am opposed to all of these bills being enacted into law. The introduction legislation to alter, modify, and invalidate the Michigan Medical Marijuana law must end. Adding private property to the list of restricted areas for consuming marijuana is unnecessary because the owner can allow people to consume on their property with their permission.

I would like these bills eliminated or modified to correct the following deficiencies in the Medical Marijuana Program.

1. 20 day mandatory processing for the receiving of medical cards by applicants.
2. Make the cards valid for 2 years
3. Increase the number of plants from 12 to 20
4. Increase the 2.5 ounces to the 3.5 ounce federal standard
5. Online processing of applications like the Secretary of State's office does with 20 day maximum turnaround.
6. Kill Senate Bill 977 (Removing Glaucoma) – violation and disrespect to Voters rights.
7. Kill Senate Bill 933 (Insurance Compensation) – Prescription drugs kill more people than Marijuana
8. Remove drug testing for marijuana as a requirement for employment in Michigan

Your prompt attention to this matter will be greatly appreciated.
